Aurora Breath

Spaces as living orbs of light

Each space floats as a luminous orb on a deep midnight canvas, breathing slowly in and out. The cursor creates invisible gravity — orbs drift apart as you approach, pull back as you leave. Everything glows.

COLOR PALETTE

Void · Aurora · Nebula · Gold · Coral · Teal

INTERACTIONS

- **Idle:** Orbs float at different rates (6–10s), each at unique phase
- **Hover:** Orb blooms +20%, glow intensifies, neighbors drift away
- **Click:** Orb expands to fill screen, transitions to timeline
- **Mouse:** Proximity repulsion — orbs drift from cursor organically

Silk Gallery

Spaces as hanging fabric panels

Translucent silk panels hang from the top, swaying gently in a soft simulated breeze. Every few seconds a gust sweeps through, setting all panels in a beautiful sequential wave. The background holds a watercolor-wash of lavender and peach.

COLOR PALETTE

Ivory	Silk	Lavender	Peach	Warm Dark

INTERACTIONS

- **Idle:** ±4° sway on sine wave, different phase per panel
- **Hover:** Panel swings toward you, scale 1.05, depth shadow
- **Wind:** Sequential gust wave every 8–12s, left to right
- **Mobile:** Horizontal carousel with momentum scroll

Deep Water Reflections

Spaces on the surface of still water

The screen splits into sky and water. Spaces sit right on the horizon line — each one reflected below in shimmering water. Hover anywhere and ripple rings bloom outward from that point. Deeply peaceful and contemplative.

COLOR PALETTE

Sky · Water · Horizon · Glass · Ripple

INTERACTIONS

- **Idle:** Reflections shimmer — slow sine-wave distortion on Y axis
- **Hover:** Ripple rings bloom from reflection point, 3–4 expanding rings
- **Hover:** Space orb above lifts +8px, glow brightens
- **Click:** Ripple expands to full screen, transitions to timeline

Drifting Polaroids

Spaces as floating memory snapshots

Spaces appear as polaroid photos floating at three depth layers — near, mid, and far. The scene shifts with your mouse creating parallax depth. Near cards drift faster, far ones slower. Everything feels like looking into a dream box of memories.

COLOR PALETTE

Cream	Canvas	Gold	Warm Dark	Bokeh

INTERACTIONS

- **Idle:** All cards float upward slowly, different speeds by depth layer
- **Hover:** Card floats forward, gold glow ring, shadow deepens
- **Mouse:** Parallax — near layer 1x, far layer 0.3x movement
- **Click:** Card spins slightly then expands full-screen

Constellation Map

Your spaces as a personal universe

The most minimal and most magical. Spaces are stars in your personal night sky, connected by gossamer constellation lines. Shared-member spaces glow with connecting threads. You navigate your own universe of memories.

COLOR PALETTE

Void · Nebula · Starlight · Gold Star · Thread

INTERACTIONS

- **Idle:** Stars twinkle with random opacity, nebula slowly drifts
- **Hover:** Star bursts, corona expands, connected threads brighten
- **Thread:** Bright dot travels along gossamer lines between spaces
- **Mouse:** Full parallax starfield — floating through deep space
